EDUCATION

University of Engineering and Technology Taxila

Jun 2029

Bachelor of Science, Software Engineering

- **GPA:** 3.4 / 4.0
- **Coursework:** Software Engineering Principles, Cloud Computing, Data Structures and Algorithms (C++), Object Oriented Programming(java), Artificial Intelligence (Python), Web Development (JavaScript)

EXPERIENCE

DecodeLabs

Sep 2026 - Oct 2026

Python Developer Intern

Remote

- Developed Python-based applications through a structured software development internship, applying software engineering practices across multiple projects.
- Built GUI applications using Python and Tkinter, including a To-Do List, Expense Tracker, Password Generator, and General Knowledge Quiz.
- Applied Python programming, file handling, GUI development, application logic, and software testing while building multiple projects.
- Maintained project documentation and organized source code using Git and GitHub.

RedFork

May 2026 - Aug 2026

Junior Software Engineer Intern

Wah cannt basti, Pakistan

- Developed responsive, user-friendly web interfaces using HTML, CSS, and JavaScript while contributing to frontend feature development.
- Assisted with developing and improving web application features across frontend and backend components.
- Debugged application issues, performed software testing, and implemented fixes to improve functionality and user experience.

PROJECTS

DevTrack

- Full-Stack SaaS Project; Technologies: React.js, Python, FastAPI, PostgreSQL, SQLAlchemy, JWT, Docker, Vercel, Railway
- Developed a full-stack project and task management SaaS platform designed to help developers organize projects, tasks, and development workflows.
- Built RESTful backend APIs using FastAPI, PostgreSQL, and SQLAlchemy, applying database design and query concepts to support structured project and task management.
- Implemented JWT-based authentication and protected API routes for secure user access.
- Developed responsive React interfaces including dashboards, project management, task boards, and authentication workflows.
- Containerized the backend using Docker and configured the application for cloud deployment through Vercel and Railway.
- Integrated frontend and backend services and configured the application for production deployment.

Web Development Projects

- Technologies: HTML, CSS, JavaScript, React.js
- Developed responsive websites and modern web interfaces using HTML, CSS, and JavaScript.
- Built frontend projects including business websites, landing pages, portfolio interfaces, and e-commerce-style UI designs.
- Focused on responsive layouts, reusable components, clean UI design, and user-friendly navigation.

TECHNICAL SKILLS

- **Programming Languages:** Python, JavaScript, Java, C++, TypeScript, PHP, Ruby
- **Frontend:** HTML, CSS, JavaScript, React.js
- **Backend:** Python, FastAPI, Node.js, PHP
- **Databases:** PostgreSQL, SQL, SQLite
- **DevOps & Cloud:** Docker, Git, GitHub, Vercel, Railway, AWS fundamentals, CI/CD fundamentals
- **AI & Automation:** AI Integration, Python Automation, n8n, AI Agents, Chatbot Development
- **Tools:** VS Code, GitHub, Figma, Eclipse
- **Concepts:** Full-Stack Development, RESTful APIs, Authentication, Database Design, Object-Oriented Programming, Data Structures and Algorithms, Software Engineering, Responsive Web Design, Cloud Deployment, Software Testing, Distributed Architectures
